MexBS EditInCart v1.0.0 User Guide

Welcome to the MexBs family, and thank you for purchasing the "EditInCart v1.0.0" Magento extension! In this document we will guide you through the installation steps, and will show you how to use and get the maximum from your extension.

Installation

Before we begin, please ensure that you have a backup of your data before proceeding with the installation of the extension. This is because although we will make our best to support you, we cannot take responsibility of any data loss that might occur during the installation of this extension.

[1] Unpack the Mexbs_EditInCart _v1.1.0.zip file.
[2] Go to Mexbs_EditInCart _v1.1.0/extension_files.
Copy the content of this directory into your Magento installation directory.
[3] Connect via SSH and go to your Magento root directory
[4] Determine the mode that your Magento is running on, by running the following command:

php bin/magento deploy:mode:show

[5] If you are in **developer** or **default** mode, run the following commands:

php bin/magento module:enable Mexbs_EditInCart --clear-static-content
php bin/magento setup:upgrade

If your Magento version is 2.0.x or 2.1.x run:

php bin/magento setup:static-content:deploy

If your Magetno version is 2.2.x run:

php bin/magento setup:static-content:deploy -f

[6] If you are in **production** mode, run the following commands:

php bin/magento module:enable Mexbs_EditInCart --clear-static-content
php bin/magento setup:upgrade
php bin/magento setup:di:compile
php bin/magento setup:static-content:deploy

[7] Go to the admin panel – "System->Cache Management" and click "Flush Magento Cache".

Testing that the extension works

The extension should work immediately after the installation. That is, no further configurations required to make the extension work after the installation.

To test that the extension works properly on your website, try doing one of the following -

1) Add a configurable product to cart. In the cart, click on the edit icon -

The edit popup should show up -

Now you should be able to change the options and the quantity of the product, click "Update" and see the changes in the cart.

2) Try doing the same for bundled product or a product with custom options. You should be able to edit the bundled/custom options and the quantity of the product.

3) Try doing the same for a simple/virtual or downloadable product. You should be able to edit the quantity of the product.

That's it!

You finished reading the manual about the features of Edit in Cart extension. We hope that it was helpful and easy to understand, and that it will make it easier for your customers to make purchases and that it boost your sales!

If you still have any questions, we are here to help -

Get Support!

We are here and we will do our best to help. Contact us on support@mexbs.com and we will get back to you ASAP with help!

Free software updates

From time to time we are going to release some cool updates for your extension. And you will get those updates for free! Currently we are working on upgrading our website, in order to make the software updates appear directly in your customer account. But for now, you will get the software updates by email on demand (because we don't want to spam you), or every time there is new release (if it's ok for you to be spammed by good software ;)).

Don't forget to send your feedback!

Every feedback is good for us! Please send us your feedback to support@mexbs.com or write it directly in the reviews section on the product page. It will be a pleasure for us to hear your opinion!

Enjoy your extension!
MexBS Team
