

## *MexBS Multi Inventory v1.0.0 User Guide*

Welcome to the MexBs family, and thank you for purchasing the "Multi Inventory v1.0.0" magento extension! In this document we will guide you through the installation steps, and will show you how to use and get the maximum from your extension.

### *Installation*

Before we begin, please ensure that you have a backup of your data before proceeding with the installation of the extension. This is because although we will make our best to support you, we cannot take responsibility of any data loss that might occur during the installation/adjustments of this extension.

### *Step 1: For Magento 2.3.x – disable the MSI*

**Note: If your Magento version is not 2.3 – please skip to Step 2**

- If you are running **Magento 2.3.0**, please disable the MSI by running the following command (pay an attention that this is a single command, so copy it as a whole):

```
php bin/magento module:disable -f Magento_Inventory Magento_InventoryAdminUi
Magento_InventoryApi Magento_InventoryBundleProduct
Magento_InventoryBundleProductAdminUi Magento_InventoryCatalog
Magento_InventorySales Magento_InventoryCatalogAdminUi
Magento_InventoryCatalogApi Magento_InventoryCatalogSearch
Magento_InventoryConfigurableProduct
Magento_InventoryConfigurableProductAdminUi
Magento_InventoryConfigurableProductIndexer Magento_InventoryConfiguration
Magento_InventoryConfigurationApi Magento_InventoryGroupedProduct
Magento_InventoryGroupedProductAdminUi
Magento_InventoryGroupedProductIndexer Magento_InventoryImportExport
Magento_InventoryIndexer Magento_InventoryLowQuantityNotification
Magento_InventoryLowQuantityNotificationAdminUi
Magento_InventoryLowQuantityNotificationApi
Magento_InventoryMultiDimensionalIndexerApi Magento_InventoryProductAlert
Magento_InventoryReservations Magento_InventoryReservationsApi
Magento_InventoryCache Magento_InventorySalesAdminUi
Magento_InventorySalesApi Magento_InventorySalesFrontendUi
Magento_InventoryShipping Magento_InventorySourceDeductionApi
Magento_InventorySourceSelection Magento_InventorySourceSelectionApi
Magento_InventoryShippingAdminUi
```

Afterwards, run the following commands:

```
php bin/magento setup:upgrade
php bin/magento cache:flush
php bin/magento indexer:reindex
```

- Otherwise, you are running **Magento 2.3.1**, please disable the MSI by running the following command (pay an attention that this is a single command, so copy it as a whole):

```
php bin/magento module:disable -f Magento_Inventory Magento_InventoryAdminUi
Magento_InventoryApi Magento_InventoryBundleProduct
Magento_InventoryBundleProductAdminUi Magento_InventoryCatalog
Magento_InventorySales Magento_InventoryCatalogAdminUi
Magento_InventoryCatalogApi Magento_InventoryCatalogSearch
Magento_InventoryConfigurableProduct
Magento_InventoryConfigurableProductAdminUi
Magento_InventoryConfigurableProductIndexer Magento_InventoryConfiguration
Magento_InventoryConfigurationApi
Magento_InventoryDistanceBasedSourceSelection
Magento_InventoryDistanceBasedSourceSelectionAdminUi
Magento_InventoryDistanceBasedSourceSelectionApi
Magento_InventoryElasticsearch Magento_InventoryGroupedProduct
Magento_InventoryGroupedProductAdminUi
Magento_InventoryGroupedProductIndexer Magento_InventoryImportExport
Magento_InventoryIndexer Magento_InventoryLowQuantityNotification
Magento_InventoryLowQuantityNotificationAdminUi
Magento_InventoryLowQuantityNotificationApi
Magento_InventoryMultiDimensionalIndexerApi Magento_InventoryProductAlert
Magento_InventoryReservations Magento_InventoryReservationsApi
Magento_InventoryCache Magento_InventorySalesAdminUi
Magento_InventorySalesApi Magento_InventorySalesFrontendUi
Magento_InventorySetupFixtureGenerator Magento_InventoryShipping
Magento_InventorySourceDeductionApi Magento_InventorySourceSelection
Magento_InventorySourceSelectionApi Magento_InventoryShippingAdminUi
```

Afterwards, run the following commands:

```
php bin/magento setup:upgrade
php bin/magento cache:flush
php bin/magento indexer:reindex
```

## *Step 2: Installing the extension*

- [ 1 ] Unpack the Mexbs\_MultiInventory\_v1.0.0.zip file.
- [ 2 ] Go to Mexbs\_MultiInventory\_v1.0.0/extension\_files. Open up the directory that corresponds to your Magento version. For instance, if your Magento version is 2.1.8, open up Mexbs\_MultiInventory\_v1.0.0-CE-2.1.x.  
Copy the content of this directory into your Magento installation directory.
- [ 3 ] Connect via SSH and go to your Magento root directory
- [ 4 ] Determine the mode that your Magento is running on, by running the following command:

```
php bin/magento deploy:mode:show
```

[ 5 ] If you are in **developer** or **default** mode, run the following commands:

```
php bin/magento module:enable Mexbs_MultiInventory --clear-static-content
php bin/magento setup:upgrade
```

If your Magento version is 2.1.x run:

```
php bin/magento setup:static-content:deploy
```

If your Magetno version is 2.2.x or 2.3.x run:

```
php bin/magento setup:static-content:deploy -f
```

[ 6 ] If you are in **production** mode, run the following commands:

```
php bin/magento module:enable Mexbs_MultiInventory --clear-static-content
php bin/magento setup:upgrade
php bin/magento setup:di:compile
php bin/magento setup:static-content:deploy
```

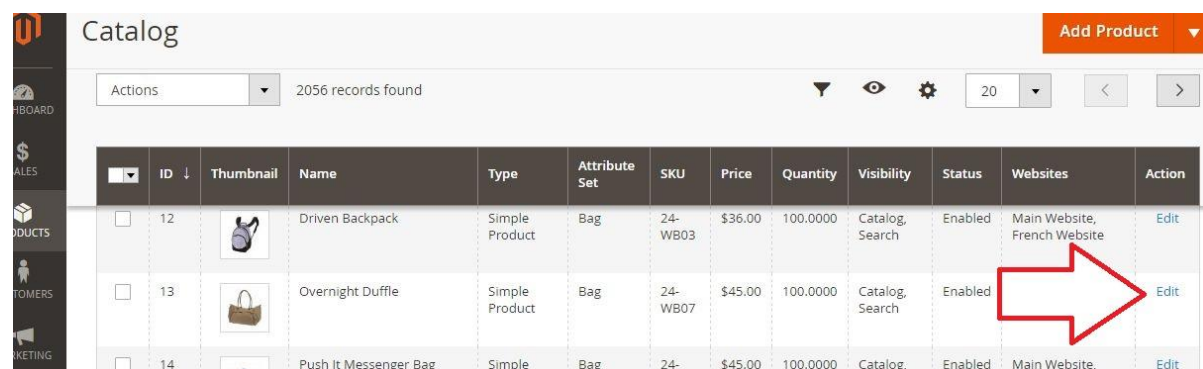

[ 7 ] Go to the admin panel – “System->Cache Management” and click “Flush Magento Cache”.

## Trying out the extension

In this tutorial we will set a **quantity** of **200** to “Overnight Duffle” product in the **Main Website** and **quantity** of **300** for “Overnight Duffle” product in the **French Website**. (The website names (Main Website/French Website) and the name of the product (Overnight Duffle) are used just for an example purpose).

### Step 1: Go to the product backend view

Go to the Admin panel → Products → Catalog, and click “edit” in the line of the “Overnight Duffle” product.

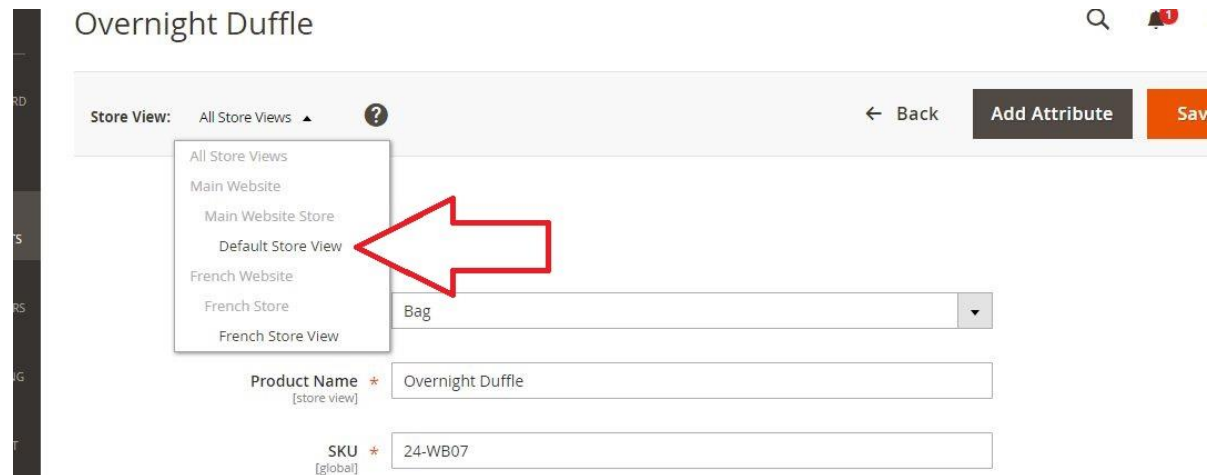

The screenshot shows the Magento Admin Catalog page. The table lists products with columns for ID, Thumbnail, Name, Type, Attribute Set, SKU, Price, Quantity, Visibility, Status, Websites, and Action. The 'Overnight Duffle' product (ID 13) is highlighted with a red arrow pointing to the 'Edit' link in the Action column.

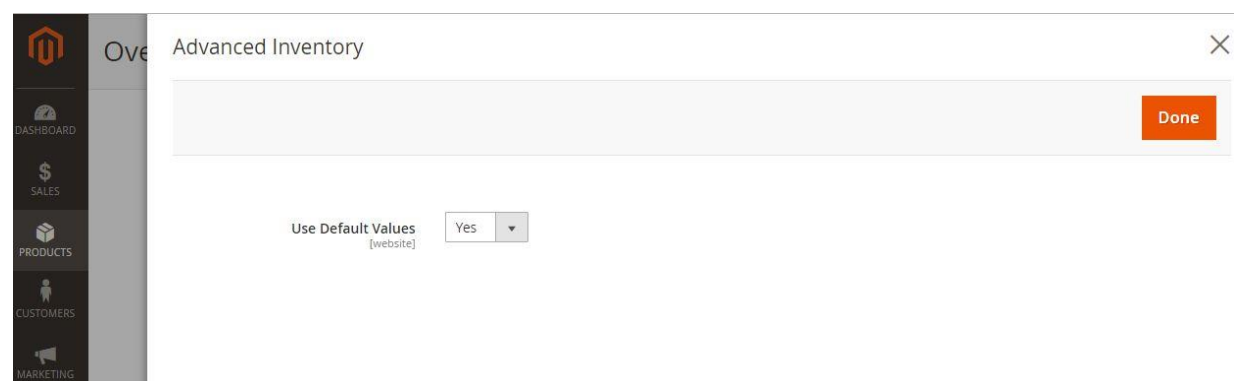

ID	Thumbnail	Name	Type	Attribute Set	SKU	Price	Quantity	Visibility	Status	Websites	Action
12		Driven Backpack	Simple Product	Bag	24-WB03	\$36.00	100.0000	Catalog, Search	Enabled	Main Website, French Website	Edit
13		Overnight Duffle	Simple Product	Bag	24-WB07	\$45.00	100.0000	Catalog, Search	Enabled	Main Website, French Website	Edit
14		Push It Messenger Bag	Simple Product	Bag	24-WB08	\$45.00	100.0000	Catalog, Search	Enabled	Main Website, French Website	Edit

## Step 2: Setting a quantity of 200 for “Overnight Duffle” in the “Main Website”

Inside the product view, switch to any store view of “Main Website”. In our case we will switch to “Default Store View”

Now that you switched to “Default Store View”, click on the “Advanced Inventory” link. In the pop up that has opened up, you should see the following –

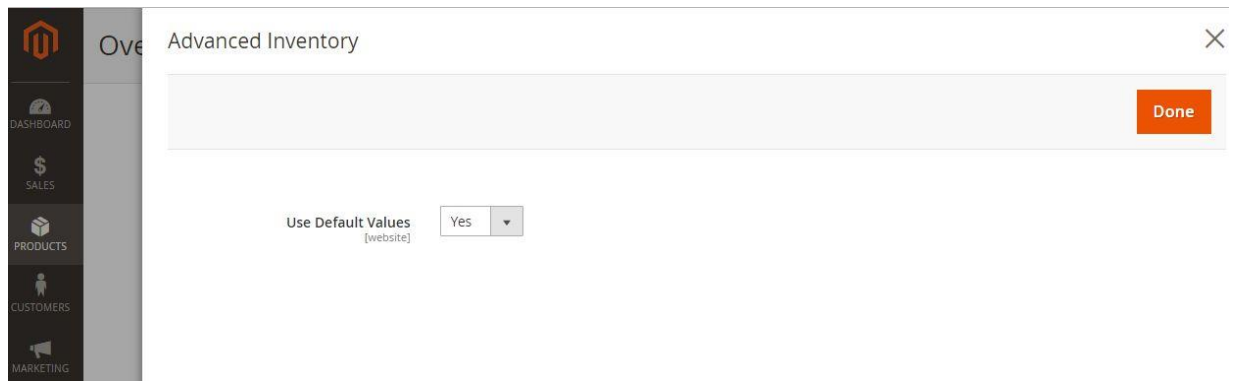

Since we don't want to inherit the default quantity, choose “No” in “Use Default Values”. The following fields should show up –

Insert “200” into the “Qty” field. Click “Done” and save the product.

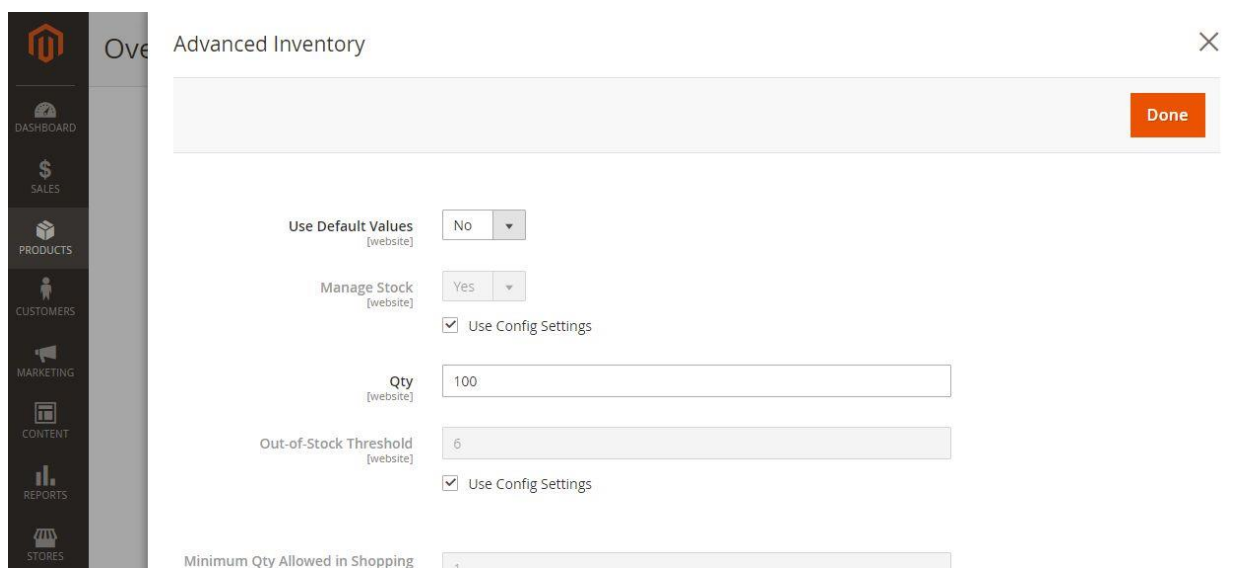

### *Step 3: setting quantity of 300 for “Overnight Duffle” in “French Website”*

Inside the product view, switch to any store view of “French Website”. In our case we switch to “French Store View”.

Now that you switched to “French Store View”, click on the “Advanced Inventory” link. In the pop up that has opened up, you should see the following –

Since we don't want to inherit the default quantity, choose "No" in "Use Default Values". The following fields should show up –

Insert "300" into the "Qty" field. Click "Done" and save the product.

***You are done!!!***

Now if you will buy the "Overnight Duffle" in the "Main Website", its quantity will decrease to 199. And if you will buy it in the "French Website" its quantity will decrease to 299.

### ***Other Inventory Fields***

Not only is the quantity field now manageable per website. All of the other inventory fields that are available in the "Advanced Inventory" popup are manageable per website as well.

### ***Inheriting From Default***

When "Use Default Values" is set to "Yes" inside the "Advanced Inventory" popup, the code will use the inventory values that are set in the default level.

## ***Get Support!***

We are here and we will do our best to help. Contact us on [sales.mexbs@gmail.com](mailto:sales.mexbs@gmail.com) and we will get back to you ASAP with help!

## ***Free software updates***

From time to time we are going to release some cool updates for your extension. And you will get those updates for free! Currently we are working on upgrading our website, in order to make the software updates appear directly in your customer account. But for now, you will get the software updates by email on demand (because we don't want to spam you), or every time there is new release (if it's ok for you to be spammed by good software ;)).

## ***Don't forget to send your feedback!***

Every feedback is good for us! Please send us your feedback to [sales.mexbs@gmail.com](mailto:sales.mexbs@gmail.com) or write it directly in the reviews section on the product page. It will be a pleasure for us to hear your opinion!

***Enjoy your extension!***  
***MexBS Team***
